DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-12, 18-20, 23, drawn to tricyclic compounds, synthesis, and use, classified in class 544; 514, subclass 251; 267.
- II. Claims 13-16, drawn to bicyclic compounds, classified in class 544, subclass 267, 271.

The inventions are distinct, each from the other because of the following reasons:

The groups are distinct as seen by the greatly differing chemical structures, as evidence by the different number of heteroatoms in the heterocyclic ring system (6 in Group I, four in Group II), and the different numbers of rings.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

A telephone call was made to Shantana Assa on 7/3/2003 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim

remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
